Re: *Amendment of the Commission's Part 90 Rules in the 904-909.75 and
919.75-928 MHz Bands, WT Docket No. 06-49*

Dear Ms. Dortch:

On March 20, 2007, Carson Agnew, Nick Frenzel, Harold Furchtgott-Roth, Michael McMains, Amy Mehlman and Janice Obuchowski, all representing Progeny LMS, LLC ("Progeny"), and Dr. Raj Singh of Telcom Ventures, met with Chairman Kevin Martin and Fred Campbell, Chief of the Wireless Telecommunications Bureau, to discuss Progeny's position in the above-captioned proceeding, as previously expressed in its comments.

We provided an overview of Progeny's proposals for flexibility in this proceeding, discussing how the proposed rule changes would foster deployment of important applications in the licensed portion of 902-928 MHz.

We noted that regulatory flexibility will serve the public interest in providing advanced services and ensuring interference protection. We noted that Progeny has demonstrated that M-LMS systems operating under the changes sought by Progeny would cause less interference to Part 15 devices than unlicensed devices can cause to each other.

In accordance with Section 1.1206(b) of the Commission's Rules, this letter is being filed with your office. Should you have any questions or concerns in connection with this submission, please contact me at (202) 371-2800.
